I TOTALLY OBJECT to this outrageous, dangerously divisive Climate Change Policy and Action Plan 2022-2025 as it is designed to destroy Australian sovereignty, control everything we do, & ignore FOOD SECURITY, INDEPENDENT ENERGY SECURITY & NATIONAL SECURITY!

I could barely get past the shocking **Statement of Commitment to Aboriginal People of NSW** - with this grossly manipulative, disingenuous, Indigenous propaganda inveigling vulnerable victims - via such idiotic climate crap, fake green renewaBULL religiosity & 'scientific' gobbledegook - into the **ANTITHESIS OF CARING FOR COUNTRY!!**

The Acknowledgement of Country & the EPA's Statement of Commitment to Aboriginal People in NSW is useless waffle that has repeatedly translated into extensive environmental destruction with swathes of precious ecological habitat clear felled, our lImited, irreplaceable FOOD resource land entombed for decades in land/water contaminating Solar Electricity Generating Works which leach poisonous selenium, tellurium & lead as the panels age/degrade/are fractured by hail, break, when inferior, burnt etc. + toxic BESS with extremely toxic fire/smoke hazard risks & ugly, health impacting, noise polluting, bird/bat chomping Wind Turbines - shedding toxic Bisphenol A (lethal to young children) into the environment & vital water sources!
This illogically & idiotically even includes approvals IN the Murrumbidgee Floodplain - with no consideration whatsoever by the EPA, NSW DPE or the Federal Government for the health & safety of human beings & stock, nor for essential, uncontaminated, life sustaining FOOD staples & FOOD SECURITY!
28,000 kms of unnecessary, astronomically costly transmission line networks are planned throughout Australia to support this fake green scam - with detrimental electro magnetic radiation (EMR) emitting health impacts also being **FORCED ON US - WITHOUT OUR CONSENT** - adding to this **UNJUST NIGHTMARE** midst rural communities & for our FOOD BOWLS!

WE HATE ALL OF THIS FAKE GREEN RUINATION OF OUR HERITAGE - OUR PRECIOUS WIRADJURI COUNTRY & THROUGHOUT RURAL NSW/AUSTRALIA!

Greedy, environmentally destructive, developers, fake green, off-shore investors, colluding corporates & the CCP are being prioritised over intergenerational equity for all Australians & the health & safety of our children.

This EPA Draft Policy/Plan is the epitome of Woke madness!
None of the hocus pocus modelling theory designed to fulfil the Government's globally imploding Net Zero scam will do a thing to change the temperature or climate - just like silly climate crap advisor Tim Flannery & his stupid, ever failing predictions!!

Instead of pandering to such flawed modelling & fake green subsidy sucking schemes, the EPA should stick to its knitting:-
**Truthfully & practically fulfilling their "critical role in protecting the environment from the threat of" contamination, pollution & observable environmental destruction.
**Responding logically & practically regarding events impacting our environment & our communities - including not approving contaminating, water run-off causing/eroding, Heat Island Effect creating, visual amenity nightmare Solar/Wind/BESS or Interconnector Transmission Lines/Towers midst communities on any arable land, near any water sources - including the Floodplains of our vital water sources.

** Due to the fact that there has ALWAYS been droughts & flooding rains & human being are unable to change the weather, EPA must learn that it isn't God Almighty & neither are alarmist lunatics - Matt Kean & Chris Bowen.
EPA needs to comprehend what scientific integrity, the truth, ethical practices & reputable evidence actually is & the need for it to be logically applied to their CLOUD CUCKOO LAND FANTASY - resulting in genuine, actual sustainability & practical, beneficial care of our precious soil & water sources so they are never put at any risk of being contaminated by fake green woke rubbish & a burdening, massive pile of contaminating toxic garbage.
** EPA actions must support independent, reliable, efficient, secure, affordable, Australian energy that underpins manufacturing/industry & the NSW Government's duty of care & committments to ensure the basic health, safety & comfort of the people of NSW - through uncontaminated, life sustaining food/water, plentiful, affordable energy & a safe, secure country with critical energy infrastructure in no way controlled by hostile actors such as the CCP's State Grid Corporation of China.

As part of my submission I include correspondence with Andrew Lewis which addresses many of the obvious, proven flaws of the extremely detrimental NSW & Federal Government's Net Zero policy.

Lynette LaBlack (Save Our Surroundings-Riverina)

Please Note:- It is disappointing that I was unable to access your survey using my iPad - my only device. It would be most helpful if the EPA's surveys were presented in a format that was easily accessible to everyone.

Reference:-
What will happen to Australia's limited, irreplaceable 6% of arable land when it is sterilised & contaminated by lead, tellurium & selenium leaching from degraded, aged, inferior, hail fractured, broken, burnt etc. Solar panels & filthy toxic BESS with their carcinogenic & teratogenic fire/smoke hazard risk, from Wind Turbine blades shedding toxic Bisphenol A (lethal to young children) in reliably productive areas like the Riverina - now growing essential healthy food staples to sustain your family - such as oats for Uncle Toby's, wheat for Sanitarium, rice for SunRice, lupins, chick peas, lentils, this pictured canola for our local GOODROP Riverina canola oil, great lamb, beef, pork & chicken etc. & bulk quantities of high quality hay & silage - relied upon throughout Australia In times of hardship??

If Clouds Could Talk! The Finger of God in Righteous Anger!

Wiradjuri Country - Ruination of Our Riverina FOOD BOWLS With Toxic Contaminating Solar Electricity Generating Works - Midst Canola Crops.
